Executive Summary

Engineering leader with deep technical background in Go, SQL, and R. 11 years of experience delivering enterprise-scale solutions.

Leadership Experience

Research Scientist 2024-10 – Present

CodeReview.io

- Designed data warehousing solution using ChromaDB, enabling analytics on 100000+ records
- Built end-to-end ML pipeline using Julia, processing 10000+ samples daily
- Implemented NLP solution using Dask, processing 500+ text documents daily

NLP Engineer 2023-02 – 2024-08

Salesforce

- Created recommendation system using LlamaIndex, increasing user engagement by 44%
- Built end-to-end ML pipeline using SQL, processing 100000+ samples daily
- Built ML model serving infrastructure using NumPy, handling 10000+ predictions/day

LLM Engineer 2018-11 – 2023-01

Google

- Developed ML models using JAX, improving prediction accuracy by 25%
- Developed computer vision models using LightGBM, achieving 17% accuracy

Data Scientist 2015-02 – 2018-11

Vercel

- Implemented NLP solution using LangChain, processing 10000+ text documents daily
- Designed data warehousing solution using Dask, enabling analytics on 1000+ records
- Established MLOps practices using Dask, reducing model deployment time by 44%
- Implemented NLP solution using Azure ML, processing 5000+ text documents daily

Education

B.A. in Mathematics — Purdue University, 2013

M.Tech. in Electrical Engineering — Columbia University, 2014
