SUMMARY

Senior technical leader specializing in data science / ml / ai with expertise in Julia, Go, TensorFlow. Proven success in technical vision, team development, and stakeholder management.

WORK EXPERIENCE

ML Engineer 2021-09 — Present

CodeCraft Studios (contract)

Designed data warehousing solution using MLOps, enabling analytics on 10000+ records

Built end-to-end ML pipeline using Pandas, processing 500+ samples daily

Created recommendation system using NLP, increasing user engagement by 48%

ML Engineer 2017-06 — 2021-08

ModelShip (contract)

Implemented NLP solution using R, processing 50000+ text documents daily

Built ML model serving infrastructure using R, handling 1000+ predictions/day

AI Engineer 2015-07 — 2017-02

PromptStack (freelance)

Implemented NLP solution using Python, processing 50000+ text documents daily

Built real-time analytics dashboard using Hugging Face, used by 10000+ stakeholders

EDUCATION

M.Tech. in Information Technology 2013

Tsinghua University — GPA: 3.83

M.Tech. in Mathematics 2014

McGill University — GPA: 3.61

SKILLS

Julia, Go, TensorFlow, Scikit-learn, Airflow, Kubeflow, NumPy, Polars, Weights & Biases, Databricks, MongoDB, Weaviate, Neo4j, GCP Vertex AI, Databricks, Deep Learning, Prompt Engineering, Vector Databases, Feature Engineering, RAG

PROJECTS

Real-time Analytics Engine (*Julia, Go, Deep Learning*)

Designed MLOps Platform leveraging Go microservices architecture with Julia for caching

Resume Parser (*Julia, Go, Deep Learning*)

Built Feature Store using Julia and Deep Learning, enabling automated processing and improving efficiency by 40%

SmartCache (*Julia, Go, Deep Learning*)

Developed Data Quality Monitor using Julia, reducing processing time by 60% through algorithmic improvements

ADDITIONAL

Personal_statement: Passionate about accessibility and building technology that makes a difference.

Personal_statement: Passionate about accessibility and building technology that makes a difference.

Spoken_language: Mandarin (Native)
