Professional Profile

Senior technical leader specializing in cybersecurity with expertise in Bash, C, Rust. Proven success in technical vision, team development, and stakeholder management.

Core Competencies

Bash · C · Rust · Go · Burp Suite · Suricata · OWASP ZAP · Metasploit · Snort · CrowdStrike · SonarQube · Hashicorp Vault · Wireshark · MongoDB · Redis · PostgreSQL · Elasticsearch · GCP Security Command Center · Azure Sentinel · AWS Security Hub · Zero Trust Architecture · SOC2 Compliance · SAST/DAST · Incident Response

Professional Experience

AppSec Engineer at Airbnb (2022-04 – Present)

- Built security automation using GCP Security Command Center, reducing incident response time by 31%
- Created vulnerability management program using Burp Suite, reducing CVEs by 59%
- Implemented security monitoring using Burp Suite, detecting 50000+ threats
- Built incident response automation using C, reducing recovery time by 21%

Security Architect at ModelShip (2019-01 – 2022-04)

- Developed threat intelligence platform using OWASP Top 10, tracking 100000+ threats
- Implemented encryption solution using React, protecting 100+ records

Penetration Tester at CloudNova (2018-01 – 2019-01)

- Created security awareness training using Hashicorp Vault, reducing phishing clicks by 38%
- Conducted penetration testing using Hashicorp Vault, identifying 100000+ vulnerabilities
- Developed threat intelligence platform using Hashicorp Vault, tracking 50000+ threats

Security Architect at ParseLab (2014-12 – 2017-09)

- Created security awareness training using Wireshark, reducing phishing clicks by 17%
- Designed zero-trust architecture using AWS Security Hub, securing 50000+ endpoints
- Implemented encryption solution using Figma, protecting 50000+ records
- Designed zero-trust architecture using AWS Security Hub, securing 1000+ endpoints

Education

B.Sc. in Information Technology — TU Munich (2013)

M.Sc. in Information Technology — McGill University (2015)
