Executive Summary

Senior cybersecurity engineer with 6 years of experience architecting and delivering enterprise solutions. Expert in Bash, Rust, C with demonstrated leadership in cross-functional teams.

Leadership Experience

SOC Analyst 2025-06 – Present

Nvidia

Designed zero-trust architecture using Snort, securing 50000+ endpoints
Created vulnerability management program using Redis, reducing CVEs by 18%

Security Architect 2021-02 – 2025-01

Confluent

Created vulnerability management program using Incident Response, reducing CVEs by 22%
Implemented encryption solution using Figma, protecting 10000+ records
Implemented security monitoring using Hashicorp Vault, detecting 50000+ threats

AppSec Engineer 2019-11 – 2020-10

Confluent

Built security automation using SOC2 Compliance, reducing incident response time by 30%
Built incident response automation using C, reducing recovery time by 30%
Implemented SIEM solution using Rust, processing 100+ logs/day
Developed threat intelligence platform using Rust, tracking 50000+ threats

Education

B.Eng. in Software Engineering — Imperial College London, 2018

Key Skills

Bash | Rust | C | Python | Snort | Burp Suite | Nmap | Trivy | Wireshark | SonarQube | Nessus | PostgreSQL |
Redis | Elasticsearch | MongoDB | GCP Security Command Center | AWS Security Hub | Azure Sentinel |
Incident Response | Threat Modeling | Zero Trust Architecture
