SUMMARY

Technical leader in backend engineering with extensive experience designing microservices, optimizing performance, and building high-performing teams. Proficiency in Rust, Node.js, Ruby.

WORK EXPERIENCE

Backend Developer

2023-11 — Present

Tesla (contract)

Developed real-time data processing pipeline using Neon, handling 10000+ documents/second
Designed and implemented message queue system using Rust, processing 100000+ messages/hour

Backend Developer

2022-09 — 2023-08

InfraCore (contract)

Designed and implemented microservices architecture using DigitalOcean, handling 50000+ concurrent users
Created authentication and authorization system using Event-Driven Architecture, securing 100+ user accounts

Software Engineer

2020-12 — 2022-05

Twilio (full-time)

Optimized database queries using gRPC, improving query performance by 47%
Mentored team of 6 junior developers on CI/CD best practices
Mentored team of 3 junior developers on Spring Boot best practices
Built event-driven architecture using PostgreSQL, processing 10000+ events daily

Backend Developer

2017-08 — 2020-09

Google (freelance)

Mentored team of 7 junior developers on REST API Design best practices
Architected and built RESTful APIs serving 1000+ requests/day using GCP, reducing response time by 27%
Created authentication and authorization system using Google Gemini, securing 1000+ user accounts

EDUCATION

M.Sc. in Artificial Intelligence

2018

University of Washington — GPA: 3.81

M.Eng. in Electrical Engineering

2015

Technion

SKILLS

Rust, Node.js, Ruby, C#, Rails, LlamaIndex, DynamoDB, Redis, Elasticsearch, Supabase, PostgreSQL, Docker, ArgoCD, RabbitMQ, Kubernetes, Jenkins, GCP, Cloudflare, Replicate, OpenAI API, Claude API, CI/CD, Microservices, GraphQL, RAG Architecture

PROJECTS

Resume Parser (*Rust, LlamaIndex, C#*)

Designed and implemented User Management API with Rust, integrating with LlamaIndex for seamless data flow

Schema Validator (*C#, Rust, Rails*)

Designed and implemented Search Engine with C#, integrating with Rust for seamless data flow

SmartCache (*Node.js, C#, Ruby*)

Developed REST API Framework using Ruby, reducing processing time by 60% through algorithmic improvements

ADDITIONAL

Personal_statement: Passionate about developer tools and building technology that makes a difference.
