About Me

Seasoned software professional with deep expertise in Python, Java, and Appium. 7 years of experience delivering mission-critical systems.

Education

B.Tech. in Computer Science

2016

MIT

Test Automation

Projects

PDF Parser Toolkit (2020)

Implemented Security Testing using Python, achieving 99.9% uptime and handling 50k+ requests daily

Tech: PyTest, Appium, Python

Health Check Service (2020)

Developed Security Testing using PyTest, reducing processing time by 60% through algorithmic improvements

Tech: Appium, Python, PyTest

Skills

- Python
- Java
- Appium
- PyTest
- SoapUI
- BrowserStack
- Git
- Jira
- MongoDB
- Redis
- MySQL
- PostgreSQL
- AWS
- GCP
- Azure
- TDD
- Test Planning

Internships / Experience

Test Automation Engineer at AgentForge (2024-04 – Present)

Developed BDD framework using Ruby, writing 5000+ scenarios

Built security testing automation using Ruby, finding 1000+ vulnerabilities

Built security testing automation using JUnit, finding 1000+ vulnerabilities

Test Automation Engineer at Vercel (2021-08 – 2023-12)

Created test reporting dashboard using GCP, tracking 1000+ test metrics

Implemented shift-left testing using TDD, reducing bug escape rate by 23%

QA Engineer at InfraCore (2018-02 – 2021-03)

Implemented CI/CD testing using Azure, catching 100000+ defects pre-production

Built security testing automation using MongoDB, finding 500+ vulnerabilities

Implemented CI/CD testing using JMeter, catching 5000+ defects pre-production

Developed BDD framework using JMeter, writing 1000+ scenarios
