About Me

Lead backend engineering professional with 8 years driving technical strategy and team excellence. Expert in Python, Kotlin, Java with track record of building and scaling engineering teams.

Education

M.Tech. in Artificial Intelligence

2017

UC Berkeley — GPA: 3.02

Teaching Assistant

Projects

Vector Search API (2019)

Designed REST API Framework leveraging LlamaIndex microservices architecture with Python for caching

Tech: LlamaIndex, Python, Java

AutoScale Monitor (2024)

Designed Event Streaming Service leveraging FastAPI microservices architecture with Python for caching

Tech: Python, FastAPI, LlamaIndex

Skills

Python

Kotlin

Java

Gin

LlamaIndex

FastAPI

CockroachDB

Supabase

MySQL

DynamoDB

Ansible

Kafka

Kubernetes

Helm

Fly.io

Railway

Anthropic

Hugging Face

Claude API

LLM Integration

CI/CD

Internships / Experience

API Developer at OpenAI (2023-11 – Present)

Optimized database queries using Google Gemini, improving query performance by 43%

Designed and implemented message queue system using Cloudflare, processing 50000+ messages/hour

Mentored team of 4 junior developers on Google Gemini best practices

Software Engineer at Uber (2020-01 – 2023-08)

Implemented caching layer with GraphQL, reducing database load by 37%

Built automated CI/CD pipelines with Spring Boot, reducing deployment time by 28%

API Developer at ModelShip (2018-12 – 2020-01)

Built event-driven architecture using LLM Integration, processing 5000+ events daily

Built event-driven architecture using NestJS, processing 1000+ events daily

Optimized database queries using FastAPI, improving query performance by 62%

Architected and built RESTful APIs serving 50000+ requests/day using Redis, reducing response time by 38%

Backend Developer at ModelShip (2017-11 – 2018-11)

Designed and implemented message queue system using TypeScript, processing 10000+ messages/hour
Led migration from monolithic to microservices using Actix, improving system scalability by 53%
