

Kristen Salazar

Backend Engineering — Dawnmouth, USA

kristen.salazar@yahoo.com · 314-467-8669

Profile

Technical leader in backend engineering with extensive experience designing microservices, optimizing performance, and building high-performing teams. Proficiency in TypeScript, Rust, Go.

Experience

Backend Developer	at Spotify	2023-09 – Present
Architected and built RESTful APIs serving 1000+ requests/day using Hugging Face, reducing response time by 21%		
Led migration from monolithic to microservices using REST API Design, improving system scalability by 67%		
AI Engineer	at Meta	2020-02 – 2023-05
Implemented caching layer with Express.js, reducing database load by 23%		
Created authentication and authorization system using Kubernetes, securing 5000+ user accounts		
Mentored team of 2 junior developers on Express.js best practices		
API Developer	at PromptStack	2018-01 – 2019-08
Built automated CI/CD pipelines with Azure, reducing deployment time by 64%		
Developed real-time data processing pipeline using Actix, handling 500+ messages/second		
Built automated CI/CD pipelines with Rust, reducing deployment time by 30%		
Created authentication and authorization system using OpenAI API, securing 100000+ user accounts		

Education

B.Tech., Artificial Intelligence	2017
UT Austin	
M.Tech., Software Engineering	2016
TU Delft	

Technical Skills

TypeScript, Rust, Go, PHP, Node.js, Flask, Django, Neon, Supabase, Redis, MongoDB, Git, Kubernetes, Jenkins, Azure, Fly.io, Render, DigitalOcean, Hugging Face, AWS Bedrock, LLM Integration, Event-Driven Architecture

Projects

Health Check Service — Created REST API Framework leveraging Django for core functionality and TypeScript for optimization
