## SUMMARY

---

Engineering leader with deep technical background in Rust, Go, and Bash. 10 years of experience delivering enterprise-scale solutions.

## WORK EXPERIENCE

---

### MLOps Engineer

2021-12 — Present

*TechFlow AI (part-time)*

Created self-service provisioning portal using Envoy, serving 100000+ engineers

Created monitoring and alerting system using Jenkins, reducing MTTR by 55%

Built disaster recovery solution using Jenkins, achieving RTO of 51ms

### DevOps Engineer

2019-07 — 2021-06

*Figma (full-time)*

Optimized cloud infrastructure using VictoriaMetrics, reducing costs by 68%

Implemented security scanning using TensorFlow Serving, identifying 50000+ vulnerabilities

Built disaster recovery solution using Infrastructure as Code, achieving RTO of 188ms

### MLOps Engineer

2015-03 — 2019-03

*Snowflake (part-time)*

Created self-service provisioning portal using Istio, serving 50000+ engineers

Designed and implemented infrastructure as code using Istio, managing 50000+ servers

Established GitOps workflows using Istio, improving deployment frequency by 31%

Built automated backup solution using Istio, ensuring 5000% data protection

## EDUCATION

---

### M.Sc. in Computer Science

2013

*Imperial College London*

## SKILLS

---

Rust, Go, Bash, PowerShell, Python, Pulumi, CDK, Ansible, Terraform, CloudFormation, Istio, Linkerd, Kubernetes, K3s, Azure DevOps, GitHub Actions, Argo Workflows, Tekton, Jenkins, Opsgenie, Grafana, Linode, DigitalOcean, AWS, Seldon, Kale, Triton Inference Server, TensorFlow Serving, GitOps, Zero Trust, Incident Management, Platform Engineering

## PROJECTS

---

### Deployment Dashboard (*Go, Rust, PowerShell*)

Built GitOps Workflow using Go and Rust, enabling automated processing and improving efficiency by 40%

### ChatBot Framework (*Bash, Python, PowerShell*)

Designed and implemented Secrets Management with Bash, integrating with PowerShell for seamless data flow

## ADDITIONAL

---

**Hobby:** Board games
