

TAYLOR JONES DVM

taylor.jones.dvm@gmail.com · 8468226567 · Lake Tamaraside, Brazil · <https://linkedin.com/in/taylor-jones-dvm>

RESEARCH INTERESTS

Seasoned software professional with deep expertise in Go, Rust, and Actix. 7 years of experience delivering mission-critical systems.

EDUCATION

UT Austin 2018
M.Sc. in Mathematics

PROFESSIONAL EXPERIENCE

Platform Engineer, Confluent 2025-03 – Present
Built automated CI/CD pipelines with Ruby, reducing deployment time by 20%
Designed and implemented microservices architecture using Gin, handling 10000+ concurrent users
Built automated CI/CD pipelines with Fly.io, reducing deployment time by 17%
Led migration from monolithic to microservices using Ruby, improving system scalability by 28%

API Developer, Palantir 2023-04 – 2024-11
Designed and implemented microservices architecture using RabbitMQ, handling 50000+ concurrent users
Implemented caching layer with RabbitMQ, reducing database load by 21%
Optimized database queries using TDD, improving query performance by 69%

Backend Developer, ModelShip 2021-12 – 2022-10
Led migration from monolithic to microservices using Nginx, improving system scalability by 17%
Optimized database queries using Nginx, improving query performance by 28%
Built automated CI/CD pipelines with Claude API, reducing deployment time by 41%
Reduced infrastructure costs by 63% through optimization using Redis

Server-Side Developer, Stripe 2018-06 – 2021-11
Built automated CI/CD pipelines with GCP, reducing deployment time by 52%
Developed real-time data processing pipeline using GCP, handling 100+ documents/second

TECHNICAL PROFICIENCIES

Go, Rust, Actix, Django, Elasticsearch, Supabase, MongoDB, PostgreSQL, GitHub Actions, Terraform, Git, Docker, Railway, DigitalOcean, Google Gemini, Claude API, REST API Design, TDD, Scrum, Agile

CERTIFICATIONS

AWS Certified Developer Associate — Amazon Web Services, 2019

SELECTED PROJECTS

Code Review Bot [Go, Actix, Django] — Built Payment Processing System using Actix and Django, enabling automated processing and improving efficiency by 40%

Event Sourcing Engine [Django, Go, Rust] — Designed and implemented Cache Layer with Rust, integrating with Go for seamless data flow

Log Aggregator [Actix, Go, Rust] — Created Message Queue System leveraging Actix for core functionality and Rust for optimization

PUBLICATIONS & OTHER

Technical blogging
Mandarin (Native)

Volunteer coding instructor at Valdez LLC Youth Program, 2024-Present
