

Michael Fuentes

DevOps / SRE / MLOps — Port Tanyaside, Australia

michael.fuentes@fuentes.dev · (872)843-4266x17979

Profile

Technical leader in devops / sre / mlops with extensive experience designing microservices, optimizing performance, and building high-performing teams. Proficiency in Python, Go, Ansible.

Experience

Platform Engineer	at Meta	2022-06 – Present
Established GitOps workflows using Pulumi, improving deployment frequency by 34%		
Optimized cloud infrastructure using Pulumi, reducing costs by 28%		
SRE	at SkillBridge	2021-05 – 2021-12
Created self-service provisioning portal using Chaos Engineering, serving 100+ engineers		
Created self-service provisioning portal using DigitalOcean, serving 1000+ engineers		
Established chaos engineering practices using SRE Practices, improving system resilience		
Implemented security scanning using Argo Workflows, identifying 5000+ vulnerabilities		
DevOps Engineer	at Airbnb	2020-02 – 2020-12
Built automated backup solution using Prometheus, ensuring 10000% data protection		
Built disaster recovery solution using Prometheus, achieving RTO of 308ms		

Education

B.A., Artificial Intelligence	2019
EPFL	

Technical Skills

Python, Go, Ansible, CDK, CloudFormation, Terraform, Envoy, Istio, Linkerd, Kubernetes, K3s, Azure DevOps, Argo Workflows, Grafana, Prometheus, Thanos, Datadog, PagerDuty, Linode, Oracle Cloud, Seldon, Kubeflow, Infrastructure as Code, Chaos Engineering, Platform Engineering

Projects

ML Model Registry — Designed and implemented Secrets Management with CDK, integrating with Python for seamless data flow

ChatBot Framework — Built Kubernetes Cluster with Python and PagerDuty, serving 10,000+ daily active users

Code Review Bot — Created GitOps Workflow leveraging Go for core functionality and Python for optimization

Other

Award: Employee of the Quarter — IEEE 2019
