Internships / Experience

AI Product Engineer at Google (2022-11 – Present)
Created feature engineering pipeline using Databricks, reducing preprocessing time by 65%
Implemented NLP solution using RAG, processing 100+ text documents daily

AI Product Engineer at Datadog (2020-04 – 2022-08)
Built end-to-end ML pipeline using Statistical Modeling, processing 50000+ samples daily
Designed data warehousing solution using Weights & Biases, enabling analytics on 50000+ records
Designed data warehousing solution using Go, enabling analytics on 50000+ records

Data Analyst at Google (2017-06 – 2019-11)
Built ML model serving infrastructure using Weaviate, handling 100+ predictions/day
Created recommendation system using Julia, increasing user engagement by 50%
Built real-time analytics dashboard using Julia, used by 500+ stakeholders
Established MLOps practices using Julia, reducing model deployment time by 58%
