RESEARCH INTERESTS

Senior technical leader specializing in qa / testing with expertise in Java, Ruby, Appium. Proven success in technical vision, team development, and stakeholder management.

EDUCATION

NUS M.Tech. in Information Technology	2014
---	------

PROFESSIONAL EXPERIENCE

QA Lead Developed API testing framework using Performance Testing, testing 100000+ endpoints Built accessibility testing using Java, ensuring compliance for 50000+ pages	, Twilio	2024-03 – Present
QA Lead Built accessibility testing using TestNG, ensuring compliance for 100000+ pages Developed API testing framework using AWS, testing 5000+ endpoints Created test data management using CI/CD Testing, generating 5000+ test records	, Spotify	2022-01 – 2024-02
QA Engineer Implemented CI/CD testing using JUnit, catching 500+ defects pre-production Implemented shift-left testing using JUnit, reducing bug escape rate by 54% Developed BDD framework using JUnit, writing 50000+ scenarios Created test data management using MySQL, generating 50000+ test records	, Microsoft	2017-09 – 2021-07
SDET Built accessibility testing using Test Automation, ensuring compliance for 1000+ pages Built mobile testing automation using JUnit, testing on 500+ devices	, Microsoft	2014-05 – 2017-04

TECHNICAL PROFICIENCIES

Java, Ruby, Appium, Playwright, Sauce Labs, Postman, Git, Docker, MySQL, PostgreSQL, Azure, AWS, GCP, CI/CD Testing, BDD, Security Testing

SELECTED PROJECTS

Event Sourcing Engine [Appium, Java, Ruby] — Designed and implemented API Testing with Appium, integrating with Ruby for seamless data flow

DataPipe CLI [Appium, Java, Ruby] — Designed Test Automation Framework leveraging Appium microservices architecture with Ruby for caching

Deployment Dashboard [Java, Playwright, Ruby] — Created Accessibility Testing leveraging Java for core functionality and Playwright for optimization
