

Sarah Valencia

DevOps / SRE / MLOps — Banksburgh, UK

sarah.valencia@yahoo.com · 456-891-5452 · <https://linkedin.com/in/sarah-valencia>

Profile

Engineering leader with deep technical background in Rust, Python, and YAML. 10 years of experience delivering enterprise-scale solutions.

Experience

Infrastructure Engineer	at Quantum Edge	2023-06 – Present
Implemented container orchestration using Tekton, managing 50000+ containers		
Optimized cloud infrastructure using SRE Practices, reducing costs by 68%		
Optimized cloud infrastructure using Ansible, reducing costs by 42%		
SRE	at Snowflake	2022-04 – 2023-01
Optimized cloud infrastructure using CloudFormation, reducing costs by 60%		
Optimized cloud infrastructure using Ansible, reducing costs by 33%		
Established chaos engineering practices using DigitalOcean, improving system resilience		
SRE	at Twilio	2018-01 – 2022-03
Designed and implemented infrastructure as code using Datadog, managing 500+ servers		
Built disaster recovery solution using Datadog, achieving RTO of 417ms		
Built automated backup solution using Argo Workflows, ensuring 100000% data protection		
MLOps Engineer	at Meta	2015-03 – 2017-08
Built disaster recovery solution using Triton Inference Server, achieving RTO of 442ms		
Established chaos engineering practices using K3s, improving system resilience		
Built automated backup solution using Triton Inference Server, ensuring 50000% data protection		

Education

B.A., Data Science	2016
TU Delft	

Technical Skills

Rust, Python, YAML, Ansible, CDK, Terraform, ArgoCD, Kubernetes, Buildah, Istio, CircleCI, GitLab CI, Argo Workflows, Tekton, Prometheus, Thanos, Grafana, Azure, DigitalOcean, Triton Inference Server, TensorFlow Serving, Kale, Seldon, MLflow, Incident Management, MLOps

Projects

Task Scheduler — Implemented Chaos Engineering Framework using YAML, achieving 99.9% uptime and handling 50k+ requests daily

Code Review Bot — Implemented Auto-scaling Solution using Rust, achieving 99.9% uptime and handling 50k+ requests daily

AutoScale Monitor — Designed Kubernetes Cluster leveraging Rust microservices architecture with YAML for caching
