

Steven York

Backend Engineering — Gabriellefort, USA

steven.york@yahoo.com · 743.674.8969x108

Profile

Seasoned software professional with deep expertise in Node.js, TypeScript, and Python. 6 years of experience delivering mission-critical systems.

Experience

AI Engineer	at Airbnb	2022-09 – Present
Implemented caching layer with Railway, reducing database load by 22%		
Reduced infrastructure costs by 39% through optimization using Rails		
Implemented caching layer with Claude API, reducing database load by 32%		
Reduced infrastructure costs by 42% through optimization using Express.js		
LLM Engineer	at Shopify	2020-02 – 2022-03
Led migration from monolithic to microservices using Rust, improving system scalability by 45%		
Built automated CI/CD pipelines with Hugging Face, reducing deployment time by 39%		
Backend Developer	at Twilio	2018-09 – 2019-08
Reduced infrastructure costs by 60% through optimization using LlamaIndex		
Mentored team of 2 junior developers on Redis best practices		

Education

M.Sc., Computer Science	2019
McGill University	
B.Tech., Artificial Intelligence	2017
TU Delft	

Technical Skills

Node.js, TypeScript, Python, Go, Rust, LlamaIndex, FastAPI, Spring Boot, Neon, SQLite, PlanetScale, Redis, Elasticsearch, Kafka, Git, Helm, GitHub Actions, Railway, DigitalOcean, Render, Cloudflare, Fly.io, AWS Bedrock, Google Gemini, Replicate, Scrum, Microservices, LLM Integration, TDD, Event-Driven Architecture

Other

Reference: References available upon request
Spoken_language: Spanish (Professional)
Personal_statement: Passionate about AI ethics and building technology that makes a difference.
