Professional Profile

Senior backend engineering engineer with 6 years of experience architecting and delivering enterprise solutions. Expert in TypeScript, C#, Java with demonstrated leadership in cross-functional teams.

Core Competencies

TypeScript · C# · Java · Ruby · NestJS · ASP.NET · Django · LangChain · Flask · MongoDB · MySQL · CockroachDB · Docker · Kubernetes · Terraform · Fly.io · DigitalOcean · Cloudflare · Azure OpenAI · Replicate · OpenAI API · AWS Bedrock · CI/CD · Agile

Professional Experience

LLM Engineer at Snowflake (2024-10 – Present)

- Optimized database queries using Fly.io, improving query performance by 59%
- Designed and implemented message queue system using Fly.io, processing 1000+ messages/hour

Server-Side Developer at Confluent (2022-05 – 2024-09)

- Led migration from monolithic to microservices using Spring Boot, improving system scalability by 45%
- Built event-driven architecture using Ansible, processing 1000+ events daily

Platform Engineer at CodeCraft Studios (2019-08 – 2022-04)

- Implemented caching layer with C#, reducing database load by 16%
- Developed real-time data processing pipeline using MongoDB, handling 100+ transactions/second
- Reduced infrastructure costs by 44% through optimization using gRPC

Education

M.Eng. in Information Technology — McGill University (2020)
