Executive Summary

Mid-level data science / ml / ai specialist with 3 years building production systems. Skilled in Scala, MATLAB, SQL with focus on performance optimization and code quality.

Leadership Experience

Data Scientist

2023-05 – Present

DeployFast

Created recommendation system using NumPy, increasing user engagement by 70%

Built ML model serving infrastructure using LangChain, handling 1000+ predictions/day

Built ML model serving infrastructure using NLP, handling 100000+ predictions/day

Developed ML models using NumPy, improving prediction accuracy by 60%

Education

M.Tech. in Artificial Intelligence — Tsinghua University, 2022

Key Skills

Scala | MATLAB | SQL | Julia | Python | Claude API | TensorFlow | Keras | Airflow | Pandas | Polars | Snowflake
| Weaviate | Qdrant | Neo4j | PostgreSQL | Hugging Face Endpoints | AWS SageMaker | Prompt Engineering |
Computer Vision
