

Paul Martin

Backend Engineering — New Kristen, France

paul.martin@martin.dev · 542-804-3805x7198 · <https://linkedin.com/in/paul-martin> · <https://github.com/paulmartin>

Profile

Mid-level backend engineering specialist with 4 years building production systems. Skilled in TypeScript, Java, Go with focus on performance optimization and code quality.

Experience

Software Engineer

at HashiCorp

2025-02 – Present

Reduced infrastructure costs by 24% through optimization using Django
Mentored team of 7 junior developers on Microservices best practices
Designed and implemented microservices architecture using Django, handling 1000+ concurrent users
Created authentication and authorization system using Django, securing 500+ user accounts

API Developer

at Cloudflare

2024-03 – 2024-11

Built automated CI/CD pipelines with Supabase, reducing deployment time by 36%
Built automated CI/CD pipelines with Express.js, reducing deployment time by 58%
Optimized database queries using Ansible, improving query performance by 57%

Platform Engineer

at PipelineIO

2021-11 – 2024-01

Designed and implemented message queue system using CockroachDB, processing 100000+ messages/hour
Designed and implemented message queue system using Kafka, processing 500+ messages/hour
Implemented caching layer with Kafka, reducing database load by 69%

Education

B.Sc., Data Science

2023

KAIST

B.Sc., Cybersecurity

2022

Imperial College London

Technical Skills

TypeScript, Java, Go, PHP, Rails, Actix, NestJS, Cassandra, Redis, CockroachDB, Supabase, MySQL, Helm, gRPC, RabbitMQ, Heroku, Vercel, Azure, DigitalOcean, Railway, Claude API, Anthropic, Replicate, Google Gemini, Azure OpenAI, Microservices, Agile

Projects

Real-time Analytics Engine — Built Cache Layer using Java and NestJS, enabling automated processing and improving efficiency by 40%

Other

Volunteering: Volunteer coding instructor at Roberts, Beck and House Youth Program, 2021-Present
