

Daniel Ray

Backend Engineering — Lake Aprilmouth, USA

daniel.ray@ray.dev · 4869780856 · <https://linkedin.com/in/daniel-ray> · <https://github.com/danielray>

Profile

Engineering leader with deep technical background in Go, Rust, and Flask. 9 years of experience delivering enterprise-scale solutions.

Experience

LLM Engineer at Quantum Edge 2022-04 – Present

Architected and built RESTful APIs serving 10000+ requests/day using Git, reducing response time by 35%

Built automated CI/CD pipelines with PHP, reducing deployment time by 68%

Created authentication and authorization system using MongoDB, securing 100+ user accounts

Created authentication and authorization system using Spring Boot, securing 50000+ user accounts

Server-Side Developer at NeuroLink Labs 2018-02 – 2021-11

Architected and built RESTful APIs serving 5000+ requests/day using Redis, reducing response time by 26%

Implemented caching layer with RabbitMQ, reducing database load by 15%

Created authentication and authorization system using AWS Bedrock, securing 5000+ user accounts

Designed and implemented microservices architecture using Redis, handling 50000+ concurrent users

LLM Engineer at Snowflake 2016-04 – 2017-11

Led migration from monolithic to microservices using AWS, improving system scalability by 47%

Implemented caching layer with AWS, reducing database load by 41%

Reduced infrastructure costs by 56% through optimization using Anthropic

Developed real-time data processing pipeline using Gin, handling 50000+ documents/second

Education

B.Eng., Cybersecurity 2014

ETH Zurich

Technical Skills

Go, Rust, Flask, Spring Boot, Redis, Supabase, CockroachDB, Git, Helm, gRPC, AWS, Azure, Vercel, Cloudflare, DigitalOcean, Replicate, OpenAI API, Anthropic, Agile, Microservices

Other

Volunteering: Volunteer coding instructor at Smith, Craig and Gray Youth Program, 2023-Present

Award: Employee of the Quarter — Google DevFest 2019
